

Fund Information

Began operations: April 16, 1984

Objective: The fund's investment objective is to provide long-term growth of capital.

Distinguishing characteristics: This international strategy seeks growth of capital by employing a flexible approach to investing in attractively valued companies in developed and emerging markets that are positioned to benefit from innovation, global economic growth, increasing consumer demand or a turnaround in business conditions.

Types of investments: Common and preferred stocks, convertibles, American Depositary Receipts, European Depositary Receipts, bonds and cash.

Portfolio restrictions: Normally, at least 80% of assets must be invested in securities of issuers in Europe or the Pacific Basin.

Implementation guidance: Consider for a core international allocation

Minimum initial investment: \$0

Fund number: 2416 **CUSIP:** 298706 84 7

Investment process

Capital Group's American Funds has helped investors since 1931 with a consistent approach that has led to consistent long-term results. The Capital SystemSM investment process divides funds into portions that are managed independently by investment professionals with diverse backgrounds and approaches, backed by an extensive global research effort.

Fund's annualized 30-day SEC yield (net): 0.12% (for Class R-4 shares at NAV as of 12/31/21)

Investments are not FDIC-insured, nor are they deposits of or guaranteed by a bank or any other entity, so they may lose value.

Investors should carefully consider investment objectives, risks, charges and expenses. This and other important information is contained in the fund prospectuses and summary prospectuses, which can be obtained from a financial professional and should be read carefully before investing.

Investing outside the United States involves risks, such as currency fluctuations, periods of illiquidity and price volatility. These risks may be heightened in connection with investments in developing countries.

Capital Group offers a range of share classes designed to meet the needs of retirement plan sponsors and participants. The different share classes incorporate varying levels of advisor compensation and service provider payments.

There may have been periods when the results lagged the index(es). The indexes are unmanaged and, therefore, have no expenses. Investors cannot invest directly in an index. Results for Lipper indexes/averages do not reflect sales charges. Lipper categories are dynamic and averages may have few funds, especially over longer periods. Lipper indexes track the largest mutual funds (no more than 30), represented by one share class per fund, in the corresponding Lipper category. Lipper averages reflect the current composition of all eligible mutual funds (all share classes) within a given category.

To see the number of funds included in the Lipper category for each fund's lifetime, please see the quarterly statistical update, available on www.capgroup.com.

Portfolios are managed, so holdings will change. Certain fixed income and/or cash and equivalents holdings may be held through individual mutual funds managed by the investment adviser or its affiliates that are not offered to the public.

Investment results assume all distributions are reinvested and reflect applicable fees and expenses.

When applicable, results reflect fee waivers and/or expense reimbursements, without which they would have been lower and net expenses higher. This information is provided in detail in the shareholder reports. For more information on fee waivers and expense reimbursements, visit capitalgroup.com.

¹Expense ratios are as of each fund's prospectus available at the time of publication.

²The portfolio managers shown are as of each fund's prospectus available at the time of publication.

³Returns for less than one year are not annualized, but calculated as cumulative total returns.

⁴YTD (year-to-date return): the net change in the value of the portfolio (in percentage terms) from January 1 of the current year to the date shown above.

⁵Certain share classes were offered after the inception dates of some funds. Results for these shares prior to the dates of first sale are hypothetical based on the original share class results without a sales charge, adjusted for typical estimated expenses.

- Class R-4 shares were first offered on 5/15/2002.

Results for certain funds with an inception date after the share class inception also include hypothetical returns because those funds' shares sold after the funds' date of first offering. View dates of first sale and specific expense adjustment information at capitalgroup.com.

⁶Figures include convertible securities. The equity breakdown by revenue reflects the portfolio's publicly traded equity holdings and excludes cash (and fixed income securities, if applicable). Underlying revenue data were compiled by MSCI and account for disparities in the way companies report their revenues across geographic segments. MSCI breaks out each company's reported revenues into country-by-country estimates. MSCI provides revenue data figures based on a proprietary, standardized model. Revenue exposure at the portfolio and index level was calculated by using FactSet, which takes these company revenue exposures and multiplies by the company's weighting in the portfolio and index. In this breakdown, Israel has been included in Europe.

⁷Totals may not reconcile due to rounding.

⁸Cash and equivalents includes short-term securities, accrued income and other assets less liabilities. It may also include investments in money market or similar funds managed by the investment adviser or its affiliates that are not offered to the public.

TERMS & DEFINITIONS

EuroPacific Growth Fund Historical Benchmarks: EuroPacific Growth Fund Historical Benchmarks Index returns reflect the results of the MSCI EAFE Index through 03/31/2007 and the MSCI All Country World ex USA Index, the fund's current primary benchmark, thereafter. MSCI EAFE (Europe, Australasia, Far East) Index is a free float-adjusted market capitalization weighted index that is designed to measure developed equity market results, excluding the United States and Canada. MSCI All Country World ex USA Index is a free float-adjusted market capitalization weighted index that is designed to measure equity market results in the global developed and emerging markets, excluding the United States. The index consists of more than 40 developed and emerging market country indexes. Results reflect dividends net of withholding taxes. These indexes are unmanaged, and their results include reinvested dividends and/or distributions but do not reflect the effect of sales charges, commissions, account fees, expenses or U.S. federal income taxes.

Lipper International Funds Average: Lipper International Funds Average is composed of funds that invest assets in securities with primary trading markets outside the United States. The results of the underlying funds in the average include the reinvestment of dividends and capital gain distributions, as well as brokerage commissions paid by the funds for portfolio transactions and other fund expenses, but do not reflect the effect of sales charges, account fees or U.S. federal income taxes.

MSCI All Country World Index (ACWI) ex USA: MSCI All Country World ex USA Index is a free float-adjusted market capitalization weighted index that is designed to measure equity market results in the global developed and emerging markets, excluding the United States. The index consists of more than 40 developed and emerging market country indexes. Results reflect dividends gross of withholding taxes through December 31, 2000, and dividends net of withholding taxes thereafter. This index is unmanaged, and its results include reinvested dividends and/or distributions but do not reflect the effect of sales charges, commissions, account fees, expenses or U.S. federal income taxes.
